

RESPONSE TO PRESIDENT CYRIL RAMAPHOSA'S STATEMENT ON ILLEGAL IMMIGRATION

Mr President. The concerns raised by citizens in regards to the influx of foreign national who are not properly administered into our country in terms of what they are here for and the correspondence of their documents to their purpose, as well as illegal immigrants in our country should have been a priority to you.

Your state address was a typical way of suppressing the ongoing demonstrations and organizations that have clearly shaken up the country in addressing immigration issues and holding officials accountable to uphold immigration laws and policies. If you really cared for your citizens and their well-being, you could have given a direct order with immediate effect on dealing with Immigration and cleaning up our country from foreigners who disrespect our laws.

It's not only a problem of illegals but even those who use documents that contradict their purpose and stay in our country. As it is, most of the ones producing documents are using fake ones obtained illegally and are not serving the purpose of those documents.

As a president you've been quiet when the people of your country needed you most but are always quick to run to other countries and intervene on their problems. Many children have died in the hands of foreigners who sell illicit and expired goods, yet you've turned a blind eye.

The death of children doesn't affect you in anyway, what more of adults trying to fix a country that you and your cabinet have destroyed.

At this point people have lost faith in government and are expressing their grievances through these mass protests. For as long as the people are not heard and prioritized, they will continue to hit the streets.

The name calling and false portrayal of organizations standing as anti illegal immigration and civil society groups, is no longer affecting us as we know what we stand for and no longer care about what you think of us.

**WE ARE A FAILED STATE BECAUSE OF POOR LEADERSHIP
AND THAT IS A FACT.**
